**Physical Schema**  
*Version 2.1*

*Description:*

*Expresses changes made to the logical schema for the purpose of the physical schema.*

The following physical schema was created based on the logical schema version 1 and version 2. Logical schema version 2.1 has new tables such as Territory. The territory entity was added to the logical schema to organize where trucks do business. In addition, a certificate relationship was added to the logical schema. The certificate entity was added for the purpose of maintaining trust with vendors and employees.
